## SUMMARY

NetSuite Developer and Functional Consultant with 3+ years of hands-on experience on real client projects for hotels and accounting firms. I combine technical development (SuiteScript 2.1, SuiteQL, SuiteFlow, SDF) with a strong functional understanding of order-to-cash and procure-to-pay processes, translating business requirements into practical, scalable solutions. Experienced in client-facing work: gathering requirements, running QA and UAT sessions, and supporting users through go-live. Known for structured problem solving, from diagnosing data and process issues to designing fixes that hold up in production. Also a Full Stack developer (React, Next.js, Node.js, SQL) with automated testing experience. Computer Technician degree, C1 English. Seeking a remote NetSuite role.

## SKILLS

| | |
|---|---|
| **NetSuite technical** | SuiteScript 2.1 (User Event, Map/Reduce, RESTlet, Workflow Action) · SuiteQL · SuiteFlow · SDF · Token-Based Auth · custom records · Script Parameters · governance optimization |
| **NetSuite functional** | Order-to-cash · procure-to-pay · credit control · collections · purchase approvals · process mapping and improvement · workflow and custom record configuration · reports and saved searches |
| **Web** | JavaScript, TypeScript, Python, SQL · React, Next.js, Node.js, Express, REST APIs |
| **Tools** | Playwright, Supertest, Git/GitHub, Docker, Vercel, AWS (EC2, S3, Lambda) |
| **Client & business** | Client meetings · requirements gathering and documentation · translating business needs into technical solutions · expectation and scope management |
| **QA & UAT** | Test case design · QA execution · coordinating UAT sessions with users · defect logging and follow-up · pre-production validation |
| **Support & go-live** | Live user support · go-live assistance · end-user training · procedure documentation |
| **Problem solving** | Structured method (reproduce, isolate, fix, validate) · diagnosing data-processing errors · root-cause analysis · reading logs and failed records |
| **Soft skills** | Clear communication with non-technical stakeholders · active listening · teamwork with senior consultants · ownership and initiative · prioritization and time management · attention to detail · adaptability · C1 English with clients and documentation |

## EXPERIENCE

### NetSuite Developer — GolData (client projects)

2023 – Present

*Informal collaboration on NetSuite projects for hotels, accounting firms and other industries.*

- Credit control on Sales Orders (User Event): blocks orders from customers over their limit; role-based bypass configurable by Finance.
- Collections reminders (Map/Reduce): automated sends across thousands of invoices, one email per customer, no duplicates.
- E-commerce integration (RESTlet + SuiteQL): Sales Order creation and real-time stock, secured with Token-Based Authentication.
- Purchase Order approval workflow (SuiteFlow): multi-level by amount and department, with 48-hour escalation.
- Joined client meetings to gather requirements and ran QA and UAT sessions before each production release.
- Provided live user support and diagnosed data-processing errors (logs, failed records, root cause).
- Migrated SuiteScript 1.0 to 2.1 and deployed through SDF versioned in Git (Sandbox → review → production).

**Freelance Full Stack Developer — Pikaros Barbería** 2026 – Present

- Pikaros Club: loyalty web app for a two-branch barbershop (React, Node.js/Express, SQLite), tested with Supertest and Playwright.

**Freelance Web Developer — Madero Realty** 2026 – Present

- Launched maderorealty.com in 2 weeks (Next.js): 400+ listings from the Tokko Broker API, with filters and map search.

**Developer & Partner — Beescend (FixBee)** 2025 – Present

- Landing page for FixBee, a workshop-management SaaS (Next.js, Tailwind), plus backend work.

**Customer Support Representative — Mera Solutions (Edesur)** 2022

- Handled high-volume cases in a CRM for an electricity distributor.

## EDUCATION

Computer Technician — Escuela Técnica N°32, San Martín · 2019 – 2023
